DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1 , 14-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Bohn (US Patent 6,525,306).

As to claim 1, Bohn teaches a mouse connected to a personal computer (computer accessory 10, column 3, lines 4-5, lines 29-30) , comprising

a casing body (housing 12, column 3, lines 11-12), provided with a space for housing a data storage medium therein (memory systems 62/64, column 7, lines 64-65, figure 4), and

a data processor (image processor 70 shown in figure 4), which communicates data between the personal computer (host computer 30 shown in figure 4) and the data storage medium (memory systems 62/64) housed in the casing body.

Art Unit: 2674

As to claim 14, the mouse as set forth in claim 1, further comprising a cable (cable 36 shown in figure 1), through which the data processor communicates the data.

As to claim 15, the mouse as set forth in claim 14, wherein the cable is connected to a USB standard connector provided with the personal computer (column 3, lines 31-32).

As to claim 16, the mouse as set forth in claim 14, wherein the cable is connected to a P/S2 standard connector provided with the personal computer (column 3, lines 31-32, P/S 2 standard is well known for mouse data connection type)

As to claim 17, the mouse as set forth in claim 1, wherein the data processor communicates the data wirelessly (column 7, lines 23-24).

Allowable Subject Matter

3. Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter:

As to claims 2-13, none of prior art teaches a door member which covers an opening formed on the casing body, through which the data storage medium is inserted or ejected, in a closed position thereof, and wherein the door member constitutes a part of an outer face of the casing body at the closed position thereof.

Conclusion

5. The prior art of record is not relied upon but pertinent to Applicant's disclosure.

Art Unit: 2674

Reference Smith is made of record as it discloses a mouse system comprising a an integrated card reader.
